PSO3: Pipeline Safety Orientation - Section 3

Safety Advantage presents Pipeline Safety Orientation - Section 3 which includes: Welding and cutting, Confined spaces, Rules for using the tools, Excavation safety, Check it out before you start work, Scaffold safety, and Ladder safety.

15 min.

PSO3S: Pipeline Safety Orientation-Spanish-Section Three

Safety Advantage presents Pipeline Safety Orientation-Spanish-Section Three which includes: Welding and cutting, Confined spaces, Rules for using the tools, Excavation safety, Check it out before you start work, Scaffold safety, and Ladder safety.

Runtime Not Available

PSO2: Pipeline Safety Orientation - Section 2

Safety Advantage presents Pipeline Safety Orientation - Section 2 which includes: Working with powered machines and equipment, Fire safety begins with you, Emergency evacuation, Your right to know about chemicals in the workplace, and Reporting injuries, location of first aid kits and precautions against bloodborne pathogens.

42 min.

PSO2S: Pipeline Safety Orientation-Spanish-Section Two

Safety Advantage presents Pipeline Safety Orientation-Spanish-Section Two which includes: Working with powered machines and equipment, Fire safety begins with you, Emergency evacuation, Your right to know about chemicals in the workplace, and Reporting injuries, location of first aid kits and precautions against bloodborne pathogens.

Runtime Not Available

PSO4: Pipeline Safety Orientation - Section 4

Safety Advantage presents Pipeline Safety Orientation - Section 4 which includes: Driving safety, Cranes and material handling, Working on, over and near water, Barricades and signs, Process safety management, Ergonomics, and Railroad safety.

31 min.

PSO4S: Pipeline Safety Orientation-Spanish-Section Four

Safety Advantage presents Pipeline Safety Orientation-Spanish-Section Four which includes: Driving safety, Cranes and material handling, Working on, over and near water, Barricades and signs, Process safety management, Ergonomics, and Railroad safety.

Runtime Not Available

PSO5: Pipeline Safety Orientation - Section 5

Safety Advantage presents Pipeline Safety Orientation - Section 5 which includes: H2S awareness; Benzene awareness; Carcinogens; Lead awareness; Asbestos awareness; Crossing fences; Poison ivy, oak and sumac; Snakes, ticks and animals; Access to employee medical/exposure records; and Abrasive blasting.

25 min.

PSO5S: Pipeline Safety Orientation-Spanish-Section Five

Safety Advantage presents Pipeline Safety Orientation-Spanish-Section Five which includes: H2S awareness; Benzene awareness; Carcinogens; Lead awareness; Asbestos awareness; Crossing fences; Poison ivy, oak and sumac; Snakes, ticks and animals; Access to employee medical/exposure records; and Abrasive blasting.

Runtime Not Available

PSO6: Pipeline Safety Orientation - Section 6

Safety Advantage presents Pipeline Safety Orientation - Section 6 which includes: Working alone, Fit for duty, Fatigue management, Cold stress, Heat illness prevention, and Sanitation.

22 min.

EmerAct-MM: Workplace Emergency Action Plan & Response

Moxie Media presents Workplace Emergency Action Plan & Response. Emergencies in the workplace can occur at any time, and often without warning. Despite how safe your worksite is, there is always the possibility of an unforeseen emergency situation. This training program will help you to prepare for emergencies before they happen. (27min)

Runtime Not Available

HWSA-MM: Welding, Cutting and Grinding: Hot Work Safety Awareness

Moxie Media presents Welding, Cutting and Grinding: Hot Work Safety Awareness. This program will instruct employees on how to identify the common hazards associated with welding, cutting and grinding, and outlines the steps needed to avoid dangerous situations before they occur. Students will come to understand the importance of operating welding, cutting and grinding equipment safely and raise their level of awareness concerning safe hot-work practices. (57min)

Runtime Not Available

DAE-MM: Drug and Alcohol Awareness for the Maritime Employee

Moxie Media presents Drug and Alcohol Awareness for the Maritime Employee. This training, designed to meet the requirements of 49 CFR Part 40 (10-01-10), educates employees on how drugs and alcohol can affect their health, job performance, and safety. Learners are advised of when testing will occur and the resulting actions which may be taken. Behavioral indicators that may suggest a substance abuse problem in a coworker are also discussed. Part of the "Drug & Alcohol Series."

31 min.

BBSO_S-SA: Behavior Based Safety - Orientation (Spanish)

Safety Advantage presents Behavior Based Safety - Orientation (Spanish)

Runtime Not Available

AMR-MM: Access to Medical and Exposure Records for Employees

The OSHA Standard on Access to Medical Records, 29 CFR 1910.1020, grants employees access to medical and exposure records kept by their employer. This concise, but comprehensive training program - filmed on location at industrial, corporate, and medical facilities - provides all the information your employees need regarding this regulation and answers any questions they may have. Length: 10 minutes.

10 min.

API_T1-MM: API RP T1: Orientation for First Time Offshore Personnel

The SEMS Rule (30 CFR 250) incorporates all of the recommended practices required in API RP 75. This requirement states that new personnel know what is expected of them during their first trip offshore. This program is tailored to new visitors or employees and includes the orientation training as recommended in API RP T1. Length: 36 minutes.

36 min.

BCS-MM: Benzene Cargo Safety

This program was developed to provide mariners with awareness level knowledge and understanding of the hazards and the preventative measures required when transferring, transporting or storing benzene cargos. This training fulfills the requirements of the American Waterways Operators Responsible Carriers (RCP) (RCP V-C-1f-2) and the USCG 46 CFR 197.565 (b). Length: 17 min.

17 min.

Con-MM: Confined Spaces - Step Back for Safety

When you enter a confined space, you may be putting yourself in a life-threatening situation without realizing it. Many confined spaces contain serious hazards that can be difficult to detect at first glance. That's why proper precautions must be taken every time. This program alerts workers to the hazards that may be waiting within a confined space. It also demonstrates important safety procedures, including confined space permitting and use of monitors or "sniffers" for reading oxygen levels and detecting toxic gases. Protecting yourself from the hazards of a confined space means working as a team (never alone), using protective equipment such as respirators, and following procedures without cutting corners. Length: 16 min.

16 min.

ASB-MM: Asbestos Awareness

For more than a century, asbestos has been used in industries all over the world. It was praised as a highly versatile product, ideal for use in commercial construction, shipyards, and many other industries. Initially, asbestos seemed like a nearly-perfect manufacturing product. However, we now know that it is also highly toxic. Prolonged exposure is known to cause Mesothelioma cancer, Asbestosis, and other life-threatening illnesses. Victims of asbestos-related diseases often do not exhibit any symptoms until decades after being exposed. Current medical data shows that approximately 200,000 people have died, or are terminally ill, from exposure on the job in the United States. And despite the dangers that asbestos presents, it is still a health hazard for millions of people who work in construction or perform housekeeping operations on the job. This program will cover critically important information that can help you recognize areas that may contain asbestos and avoid exposure on the job.

30 min.

DO-MM: Dropped Object Prevention for the Oilfield Industry

A grease gun dropped from a height of 30 feet generates enough force to kill a worker below. Even a smaller object, such as a screwdriver or shackle, can cause a serious injury when dropped from above. Thats why it is so important to prevent all dropped objects, without exception. This program describes the hazards and risk factors that make dropped objects a serious problem at oil and gas installations and facilities. It also focuses on the best practices in dropped object prevention throughout the industry. This training is also an excellent tool to help your company comply with dropped object prevention initiatives. Length: 12 min.

12 min.

DS-MM: Driving Safety for Oilfield Employees

Government studies show that across the industry, almost 30% of fatalities result from motor vehicle crashes. For some companies, such as those providing well services, the numbers are even higher. This program addresses both the leading risk factors for motor vehicle accidents and how to ensure safety through accident prevention. Length: 38 min. Topics Include: Night Time Driving and Fatigue; Cell Phone Use and Texting; Driving Under the Influence; Hazardous Weather Conditions; Equipment Failure; Vehicle Inspection; Trip Planning; Defensive Driving.

38 min.

ED-MM: Marine Survival: Emergency Marine Distress Signals

Regardless of vessel or offshore installation size, the sea is unpredictable and without warning can place the lives of all crew members in jeopardy. In addition, unforeseen accidents such as fires, equipment malfunctions and capsizing can trigger an emergency evacuation of personnel. It is vital for crews to understand and be trained in the use of marine distress signals ranging from radio communication and visual markers such as flares, smokes or rockets, to electronic locators such as EPIRBs and SARTs. In this program, maritime employees will learn how to rapidly notify search and rescue authorities to their emergency and assist them by quickly guiding rescue craft to their location. This is vital compliance training that can literally save the crew's life! Length: 25 minutes.

25 min.

Elec-MM: Electrical Safety - Step Back for Safety

Electricity is essential to modern life. It powers the workplace and the world around us, but it can also present life-threatening hazards if it is not handled properly. This program focuses on methods for safe work and injury prevention. These safety measures include carefully inspecting electrical components, removing broken equipment from service (such as frayed cords), grounding equipment using Ground Fault Circuit Interrupters, avoiding power lines and stormy weather, and using the correct PPE. Teach your workers how to keep themselves safe when working around electricity by recognizing electrical hazards and using the right techniques to control them. Length: 11 minutes.

11 min.

EPA-MM: Emergency Platform, Rig and Vessel Abandonment

When an emergency on board an offshore platform, rig or vessel takes place, personnel need to know how to respond without "panic" in order to increase their chances of survival. This program, shot at actual offshore and maritime locations, covers controlled and uncontrolled abandonment and the various means of escape available, including lifeboats, life rafts, and water entry. Topics Include: The Importance of the Station Bill; The Importance of Holding Realistic Drills; Types of Alarms; Environmental Risks of Fire and Water; The Benefits of a Positive Attitude & Extensive Training.

Runtime Not Available

RP10-MM: Trenching & Excavating, Pits & Ponds

Moxie Media presents Trenching & Excavating, Pits & Ponds All personnel working in or even in the area around trenches and excavations should be trained to recognize the hazards of these operations and use the proper procedures to prevent incidents and injuries. This program provides training in working responsibly and safely in and around trenches and excavations.

27 min.

TWIC-MM: TWIC MTSA Training Version

Moxie Media presents TWIC MTSA Training Version This program concentrates on the training aspects of the Maritime Transportation Security Act (MTSA) Amendments and Regulations regarding TWIC implementation.

27 min.
